Johnstone's Trade Stormshield Flexible Trim

The Stormshield Flexible Trim range — which includes the Flexible Primer Undercoat, Flexible Satin and Flexible Gloss — is now fully available in over 16,000 colours, providing decorators with a long-lasting protection to exterior wood, including windows, doors, fascias and timber cladding.

When used as a system with the Flexible Primer Undercoat, the Flexible Gloss and Flexible Satin are both said to offer longer lasting protection compared to using trim paints that are primarily designed for internal use. The system provides up to eight years' protection to first major maintenance, reducing the need for shorter term redecoration programmes.

Gledhill Torrent Eco

The range of thermal stores from Gledhill has been developed utilising the most advanced technology to provide even greater energy efficiency and high performance. The Torrent Eco range features a high-efficiency ErP-ready pump, flow sensor technology, increased store temperature capacity and an integral secondary return as standard, significantly improving efficiency for installations, especially when using renewable energy sources.

The new range has evolved Gledhill's original Torrent GreenHeat thermal store and offers homeowners more flexibility to maximise the available heat sources, including woodchip burners, biomass stoves and traditional wood burning stoves.

Premdor Apartment SoundSecure Doorsets

Building Regulations relating to apartment entrance locations are particularly complex, requiring a combination of multi-point security locking, Fireshield FD30 or FD60 Firedoor performance and sound reducing construction. Doors must present a thumb turn release facility to assist escape in the event of a fire and be fully compliant with all mobility regulations.

Premdor Apartment SoundSecure Doorsets carry Secured by Design approval, which is a police-preferred specification. The Premdor range balances the above requirements with stunning good looks and a highly competitive pricing structure, according to the supplier.

Moduleo Click with LockXpress

Moduleo has introduced its new Click with LockXpress to the UK market and the upgraded product has been engineered for an increase in strength.

Manufactured with the latest patented push down technology, the Click with LockXpress system simply locks into place without any adhesive, and outperforms all other products on the market, claims the manufacturer. All Moduleo products are available in both a traditional LVT construction, as well as the simple-to-install Click with LockXpress system.

BigWipes 40-wipe sachets

Tradespeople can now take the power of Big Wipes wherever they go, because, for the first time, the industrial strength wipe specialist has harnessed its 4x4 formula in new compact sachet packs of 40 wipes.

Thanks to these conveniently sized sachet packs, you can now keep the Big Wipes 4x4 'one wipe and it's gone' cleansing power even closer to hand than ever before, states the company. The sachet pack dimensions have been designed and specified to fit perfectly into the tool pouches of most leading brands of workwear, van gloveboxes and toolbags.

Timloc Radiator Pipework Air Barrier

Timloc has added a Radiator Pipework Air Barrier to its range of products. The air barrier is an effective, easy and quick solution to help reduce air leakage. It aligns with Building Regulation Part L, which states that a maximum air leakage performance must be achieved in the design and build of all new homes.

Timloc's Radiator Pipework Air Barrier has an impressive air leakage performance rate at 2Pa (average standard static pressure) and Part L's testing pressure of 50Pa — without the need for sealants. A purpose-designed, face-fix unit, it provides an air leakage barrier around the point of entry for through wall 10mm plastic radiator pipework.
