### IT'S ALL IN THE GRANULES.

22 February 2016 By HPM Magazine

Most days can be messy days when you're out on site, but with the Big Wipes Power Gel, tough grime can be quickly shifted, so you can leave the dirt at work. Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing special 'power scrub' granules, which means the Power Gel can remove deeply ingrained dirt and grime 100% faster than smooth gels.

While Big Wipes hand cleaning wipes are perfect for mopping up muck on the go and when water is not available, Big Wipes Power Gel is ideal for an end-of-day deep clean. Simply rub the Power Gel into your hands and let the power granules do their work, then rinse with water and dry your hands. Just a small amount of the Power Gel can easily remove uncured paint (oil, water and hammer finish), adhesives (including adhesive and tape deposits), silicone, epoxy, PU foam, oil, grease and much more from the skin. The fresh citrus scent means hands smell good too, which is important for those tradespeople who, for instance, have to eat lunch on site or meet customers after handling materials.

Big Wipes Power Gel is not just highly effective at intense cleaning, it's also kind to the skin. The 1 Litre plastic container features a hygienic, non-clogging pump dispenser, which helps prevent cross contamination of dermatitis and other skin related diseases. As the pump dispenses just the right amount, wastage is reduced, while the powerful yet gentle ingredients mean that your most important tools, your hands, are well protected. So after a mucky day on site, turn to Big Wipes Power Gel and let those granules get your hands spotless in seconds.
