DANFOSS HONEYWELL "HANDS ON" WIRING

Responding to feedback from engineers, MR COMBI TRAINING in Bedford is now offering wiring courses from Danfoss and Honeywell. Engineers have the option to complete both courses in one day, saving them time and money. Delegates have the opportunity to get hands on, with specially designed test rigs, in order to practice until perfect. An A5 wiring book is also available at mrcombi.com. This

includes a vast array of information and diagrams including: four part electrical safety tests; Danfoss 2 and 3 port valves; Honeywell S, Y, C & W plans; frost protection; schematics; fault finding charts; boiler wiring; programmer wiring and checking components.

APPRENTICE WINNER ADOPTS BIGCHANGE

The Apprentice winner 2015, Joseph Valente, has selected BIGCHANGE's JobWatch platform to accelerate the growth of Impr-Gas, the plumbing business he owns 50:50 with Lord Sugar. Impr-Gas is on a mission to revolutionise the plumbing industry, using the latest technology to offer people a faster, higher quality service. After a rigorous tender process the company chose

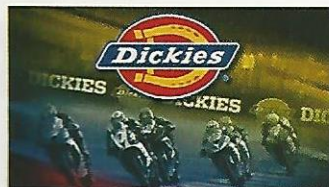

BigChange's all-in-one Mobile Workforce Management system. The paperless app-based JobWatch system allows Joseph's management team to manage the entire operation from quotation all the way through to invoice.

DICKIES TAKEOVER TITLE SPONSORSHIP

DICKIES have announced their new BSB agreement with MSV, which will see them invest further with the ever-popular leading motorcycle championship. With their previous BSB team associations and workwear provider partnership, The Dickies 2016 British Supersport Championship will be named as such after a new title sponsorship deal was agreed with series rights-holder and organiser

MotorSport Vision. Currently the famous clothing brand supplies the 'Dickies Orange Army' overalls for the track marshals, as well as providing race meeting attire to the doctors, paramedics, timekeepers and media.

EVEN CLEANER 'BLUE FLAME' TECHNOLOGY

For over two years, GRANT'S R&D team have been busy developing and trialling a new generation of clean burning, low emission and high efficiency boilers to exceed EU emission changes planned to come into force in 2018. The result is the all new 'VortexBlue' range of oil fired condensing boilers, incorporating a new blue flame Riello compact burner. Outputs from 21-36kw will be available across a variety of models and,

although the technology is very advanced, the boiler and burner combination is easy to install and set up. Boiler size was a particular area of concern and we are pleased to confirm that all dimensions on the new models are the same as the existing ranges.

IT'S ALL IN THE GRANULES

Most days can be messy days when you're out on site, but with the BIG WIPES Power Gel, tough grime can be quickly shifted, so you can leave the dirt at work. Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing special 'power scrub' granules, which means the Power Gel can remove deeply ingrained dirt and grime 100% faster than smooth gels. While Big Wipes hand cleaning wipes are perfect

for mopping up muck on the go and when water is not available, Big Wipes Power Gel is ideal for an end-of-day deep clean. Simply rub the Power Gel into your hands and let the power granules do their work, then rinse with water and dry your hands.

SNICKERS' PATENTED KNEE PROTECTION

With long term knee injuries all too common among professional tradesmen, SNICKERS patented knee protection system delivers the ideal solution - to the most stringent EU standards. The NEW D30 Kneepads deliver the most advanced knee protection available today. With superior cushioning and protection, they're made from D30 LITE - a high-tech material that's flexible, durable and cut-resistant that complies with

CE standard EN14404. Like every other Snickers' Kneepad, the new D30 Lite Craftmen Kneepads are designed to fit Snickers Workwear's unique and patented KneeGuard positioning system which allows wearers to adjust the kneepads at different heights in the kneepad pockets.

JAGA TRENCH HEATING SYSTEMS

Long gone are the days when homeowners were limited to standard steel-panelled wall radiators as their only heating option. Subtle, stylish radiators have become far more accessible. Not only that, they can significantly enhance both heat output and a building's energy performance. The residents of Kenilworth Cottage in Cheltenham set about taking advantage of one particularly suitable alternative for

home installation, and one that is ideally suited for positioning in front of French windows or bi-fold doors: trench heating from JAGA HEATING PRODUCTS.
