ANDREWS WATER HEATERS HEXFLO PLATE HEAT EXCHANGER

Andrews Water Heaters' new HEXflo plate heat exchanger provides instantaneous domestic hot water and eliminates the

need for a secondary storage vessel. Compatible with a variety of heat sources, it is an effective, efficient alternative if gas fired water heaters are not a suitable option. The HEXflo plate heat exchanger is designed to provide instantaneous hot water to taps and showers in commercial and public sector buildings. The primary heating side is fed from a buffer store that can be heated by gas or biomass boilers, immersion heaters or CHP units. The product can be fitted as a single appliance or, if larger volumes of hot water are required, as a cascade of up to four units.

BOND IT PRO RANGE

A range of products based on advanced hybrid technology has been introduced to the market by Bond It.

The new products, which will be sold under the manufacturer's PRO brand, offer users 'best of both worlds' solutions to a wide variety of trade needs. Like a silicone sealant, Bond It's new hybrid products cure rapidly, are non-bubbling, are free from solvents and isocyanates, can be applied at low temperatures and offer good UV resistance, says the manufacturer. Like a polyurethane sealant, they are also tear resistant and easily painted, even with water-based paint.

CONEX BÄNNINGER >B< PUSH FITTINGS

The entire >B< Push range is claimed to be a quick and easy to fit, flame-free fitting with an installation time of a few seconds, and with its demounting capability it can be re-used up to 20 times on copper tubes. Thanks to the one push fits all system, it is suitable for most retro-fit applications. The fittings are manufactured with a corrosion resistant, low-lead DZR body that comes with a 25 year warranty, meaning that they are compatible with various tube types, including Copper, PE-X and PB.

FLIR SYSTEMS TG130

The new Spot Thermal Camera from FLIR features the FLIR Lepton core that is the size of a smart phone SIM card. This makes the new TG130 lightweight, ergonomic and pocket portable so it is always available for instant troubleshooting. Simply aim the instrument at a target object or surface to measure the temperature, then click the trigger to freeze and view the image. The FLIR TG130 is suitable for spotting thermal anomalies which can then be flagged for more detailed thermal inspection. The same unit can be used for looking at heat loss, bad electrical connections, HVAC performance and source water leaks.

STABILA LD220 AND LD250 LASER DISTANCE MEASURES

The Stabila LD220 and LD250 laser distance measures feature the latest measuring technology in a compact format, taking up little more room in a pocket or tool bag than a standard tape measure. Producing quick results to ensure efficiency when measuring out any job, the handy laser measure has a large display to make the results easy to read and overcomes the tricky juggling act of measuring distances or carrying out estimations when working alone. Compliant with Standard ISO 16331-1, the Stabila LD220 has a range of 0.02 to 30m and offers four basic functions: single distance, volume, area and tracking, while the LD250 can be used to measure distances of up to 50m, with an accuracy of $\pm 2.0\text{mm}$.

BIG WIPES POWER GEL

Most days can be messy days when you're out on site, but with the Big Wipes Power Gel, tough grime can be quickly shifted, so you can leave the dirt at work, asserts the company. Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing special 'power scrub' granules, which means it can reportedly remove deeply ingrained dirt and grime 100% faster than smooth gels. While Big Wipes hand cleaning wipes are suitable for mopping up muck on the go and when water is not available, Big Wipes Power Gel is ideal for an end-of-day deep clean. Simply rub the gel into your hands and let the power granules do their work, then rinse with water and dry your hands.
