

## ABRASIVE ACTION

Incorporating high adhesion web technology, the new Abrasive Quad Fabric from Big Wipes grips 40% more grime with every wipe, says the company, so you can mop up even the toughest dirt in the quickest time.

In 2014 Big Wipes launched its 4x4 range of industrial strength wipes, containing four cleaning agents and four dermatologically tested skin conditioners. Now the company has launched Big Wipes Heavy-Duty Quad Fabric. The new wipes have increased strength and greater absorbency.

Fibres of different denier grades are mixed in the layers: finer deniers for greater density and higher tensile strength, heavier deniers to break the smoothness and provide a rougher surface. Combine this with the an absorbency of 7.93 grams/grain and muck can be

soaked up and trapped in the wipe more quickly, leaving your hands, tools and surfaces cleaner than ever.

The new abrasive wipes are still kind to your hands and the environment: no chemicals or preservatives have been added and the fabric is made from polymers, which are 100% recyclable.

## JUMP ON THE BAND WAGON

Hitachi Power Tools has launched the CB18DBL 18V Band Saw, featuring a brushless motor for greater power on-site and quicker cutting time than ever before.

The band saw has been designed for ease of use and operator safety.

The LED work light illuminates the blade edge or work material for use in dark areas and the guide plate is adjustable from 20mm to 45mm to match the work material width.

The 3.6kg of weight is evenly distributed, with the battery and motor placed on opposite sides of the tool and the handle positioned near the centre of gravity, reducing user fatigue and increasing control.

The band saw also has a soft grip handle, a remaining battery indicator, an ambidextrous safety switch lock and large saw wheels for improved blade life and quick and easy blade replacement.

The soft start motor increases control and safety by reducing kickback when starting the motor, allowing for greater control.

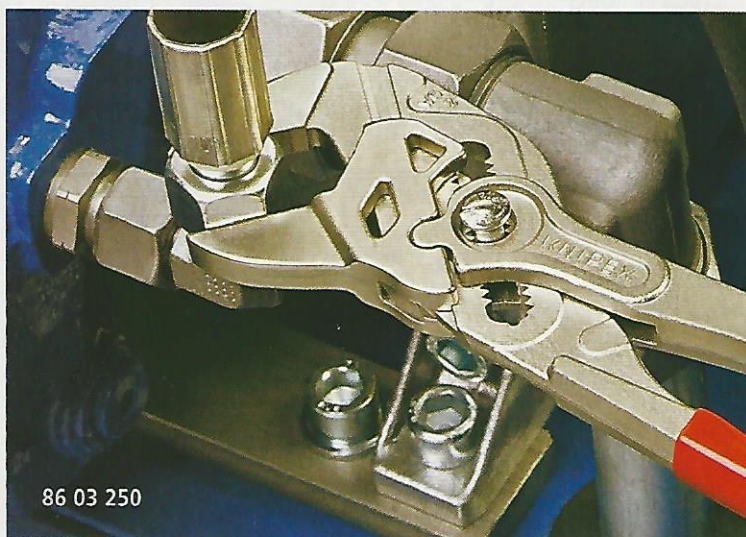

Available as a 'body only' tool, the band saw can be powered by all of Hitachi slide batteries from 1.5Ah to 6.0Ah.

With Hitachi's three-year warranty available when registered online within four weeks of purchase, trade professionals can be assured of long service and peace of mind.

## Pliers Wrench

pliers and a wrench in a single tool

- smooth jaws for damage free installation of plated fittings - working directly on chrome!
- zero backlash jaw pressure prevents damage to edges of sensitive components
- also excellent for gripping, holding, pressing and bending workpieces
- push the button for adjustment on the workpiece
- parallel jaws give a more solid grip; its design allows flexible adjustment of all widths up to the specified maximum size
- lever transmission greater than 10 : 1 for strong gripping power
