Hand gel shifts grime

18 February 2016

Most days can be messy when you're out on site but with the Big Wipes Power Gel, tough grime can be quickly shifted.

Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing special 'power scrub' granules, which means the Power Gel can remove deeply ingrained dirt and grime 100% faster than smooth gels, according to Sycamore UK.

While Big Wipes hand cleaning wipes are suitable for mopping up muck on the go and when water is not available, Big Wipes Power Gel provides an end-of-day deep clean. Rub the Power Gel into your hands and let the power granules do their work, then rinse with water and dry your hands. Just a small amount of the Power Gel can easily remove uncured paint (oil, water and hammer finish), adhesives (including adhesive and tape deposits), silicone, epoxy, PU foam, oil, grease and more. The fresh citrus scent means hands smell good too.

The 1 Litre plastic container features a hygienic, non-clogging pump dispenser, which helps prevent cross contamination of dermatitis and other skin related diseases. The gentle ingredients are also kind to skin.
