### Big Wipes launches the 300-wipe Multi-Purpose Bucket

Big Wipes has now introduced a new and reusable bucket, containing 300 industrial strength Multi-Purpose wipes, so installers will never run short while on the job.

Big Wipes 4x4 easily shift all modern construction sealants, adhesives, paints, coatings and grime in an instant. Containing four powerful cleaning agents and four dermatologically tested skin conditioners, they are truly tough on grime but kind to your hands.

Big Wipes 4x4 Multi-Purpose wipes are made from a three layered, non-woven quilted fabric, exclusive to Big Wipes. This highly absorbent fabric captures liquid between the fibres, minimising the number of cleansing wipes used for any cleaning job.

The innovative Power Fabric Technology also results in the wipes being extremely tear resistant, lint-free and super tough – making light work of cleaning up your hands, surfaces and tools after a mucky day out on site.

The Big Wipes 4x4 range has been assessed to the latest EU Regulation 1223/2009 for cosmetic products with zero levels of irritation recorded during controlled testing by dermatologists. The range also offers >99.9% antibacterial protection for your skin. All Big Wipes are used without water and thus are perfect for on-site and for tradespeople on the move.

Ideal for vans and workshops, grab a Big Wipes Multi-Purpose 300-wipe bucket and you will always have the perfect clean-up wipe to hand.

For more information about Big Wipes visit [www.bigwipes.com](http://www.bigwipes.com)
