## Big Wipes launches a 300-wipe Multi-Purpose Bucket

Big Wipes has introduced a new and reusable bucket, containing 300 industrial strength Multi-Purpose wipes.

Big Wipes 4x4 have been designed to shift all modern construction sealants, adhesives, paints, coatings and grime in an instant. Containing four powerful cleaning agents and four dermatologically tested skin conditioners, the company believes they are tough on grime but kind to your hands.

The 4x4 Multi-Purpose wipes are made from a three layered, non-woven quilted fabric, exclusive to the company. The highly absorbent fabric captures liquid between the fibres, minimising the number of cleansing wipes used for any cleaning job.

The Power Fabric Technology also results in the wipes being tear resistant, lint-free and 'super tough' – designed to make light work of cleaning up hands, surfaces and tools after a mucky day on site.

The Big Wipes 4x4 range has been assessed to the latest EU Regulation 1223/2009 for cosmetic products with zero levels of irritation recorded during controlled testing by dermatologists. The range also offers >99.9% antibacterial protection for skin.

Big Wipes are used without water and thus are perfect for on-site use.
