

WELL FIXED FOR FASTENINGS

Construction connector manufacturer Simpson Strong-Tie has released an all new 'Nails and Screws' brochure for spring 2016. Featuring a host of new products, the Nails and Screws edition consists of four sections: structural screws, corrosion resistant fastenings, Quik Drive collated screw systems and fastenings for use with construction connectors. As the range has been fully tested and CE-marked, the brochure also includes mechanical properties as well as loading and performance

information. Simpson Strong-Tie's sales director Jon Head said: "Our Nails and Screws brochure is packed with solutions to make life easier for building designers and installers alike – whether they work with timber, steel or concrete."

READY FOR EVERYTHING

The Snickers' Next Generation Workwear range is a line of modern working clothes that combine fit with hardwearing comfort and advanced functionality. The WorkTrousers are in a new, contemporary design packed with features that focus on fit, comfort and freedom of movement using hardwearing fabrics for long-lasting protection. The new ALLROUND WorkTrousers feature better knee protection than ever before, built-in leg ventilation and a stretch gusset for extra freedom of movement.

Made from a hardwearing nylon 'Dobby Pro' fabric with Cordura reinforcements, the work trousers not only have a host of handy pockets, but extra features like an advanced side panel design that gives balanced weight distribution when carrying tools and fixings.

SOLID GEAR FOR THE JOB

Nowadays, good safety shoes are part and parcel of a day's work on-site – just like good working clothes and quality hand tools. It really isn't worth wearing cheap boots that make your feet feel as though they've been in leaden diving boots all day. That's why it's important to choose a shoe that has three key features – protection, comfort and durability. The Hultafors Group's new 'Solid Gear' brand – available through Snickers Workwear stockists in the UK – is redesigning working footwear with

the new HYDRA GTX trainer-style safety shoe. It's a technical safety shoe that integrates modern design with tough materials for water protection, durability and a sporty look.

STERLINGOSB IS THE BEES' KNEES

An amateur beekeeper has used Norbord's SterlingOSB to house his three colonies of bees in Maidenhead, Berkshire and Egham, Surrey. Richard Emmett has used SterlingOSB as a ready substitute to build his three 'national' hives to house his bee colonies. Due to the single-walled nature of the hive, and the sensitivities of wild bees, it is imperative that they are made using light, weatherproof, untreated materials. Many national hives used by British beekeepers are

made of cedar wood or pine but these materials are relatively expensive. A single national beehive, including bees, made from a flat pack, self-assembly kit made of cedar can cost up to £750 to make.

GRIME FREE ON-SITE

While Big Wipes hand cleaning wipes are suitable for mopping up muck on the go and when water is not available, Big Wipes Power Gel is designed for an end-of-day deep clean. Big Wipes Power Gel is an all-in-one multi-purpose skin cleaner containing 'power scrub' granules, which means the Power Gel can remove deeply ingrained dirt and grime faster than smooth gels. Rub the Power Gel into your hands and let the power granules do their work, then rinse with water and dry your hands. Just a small amount of the Power Gel can remove

uncured paint, adhesives, silicone, epoxy, PU foam, oil, grease and much more from the skin. The one litre plastic container also features a hygienic, non-clogging pump dispenser, which helps prevent cross contamination of dermatitis and other skin related diseases.

CAST IRON CLASSICS

MHS Radiators offers a range of traditional cast iron models for period and modern interiors. Whether smoothly polished or detailed and ornate, traditional cast iron radiators add a touch of classic splendour to any property – either as part of a new heating system or period refurbishment project. The MHS range is manufactured from the highest quality cast iron for excellent corrosion resistance, as well as minimum maintenance. All models are also guaranteed for 10 years, as well as available in electric

only options. Each traditional cast iron radiator is supplied complete with fittings for ½" bsp connection as standard, with the option for ¾" or 1" with TBOE and TBSE connections if required.

REDLAND ADDS RAPID ROOF VENT TILE

With rising demand in the newbuild and reroofing markets, the Rapid Roof Vent Tile for Slate 10 will assist contractors in providing mechanical, soil or roof space ventilation to comply with BS 5250:2011, reducing the risk of harmful condensation in the roof. Designed to look like a standard roof tile, the Rapid Roof Vent Tile comes with an underlay seal for improved fit and controlled ventilation. The tile has been tested in a wind tunnel, ensuring it provides superior weather performance, making

it suitable for use in all UK exposure zones. The vents also have pitch range of between 17.5° and 60°, which guarantees their versatility in a variety of roofing situations and conditions. Available in four colours, Grey, Terracotta, Black and Brown, the vent is compatible with the full Slate 10 range.

BIGGER, TOUGHER, SMARTER

Toolstream's new range of SmartWipes are available in five variations – Heavy Duty, Stainless Steel, Carpet & Upholstery, Universal and Trade. Heavy Duty SmartWipes are coated with abrasive fibres for agitating stubborn dirt, grease and grime, making them suitable for use in the shed and workshop. Stubborn kitchen grease and dirt can be shifted with the Stainless Steel wipes, which leave a rejuvenated shine on stainless steel surfaces. Covered floors and furniture

are also taken care of with Carpet & Upholstery SmartWipes, which remove everyday spots and stains from carpets and upholstery. Also available are SmartWipes Universal and Trade, for widespread cleaning of paint, tar, ink, adhesives, PU foams, caulks, silicone, duct tape residue and pet mess, plus much more.
