## SNICKERS Work Glove Range

Snickers are trying something different with this

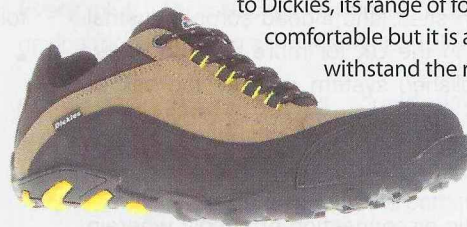

range. The various gloves are available individually so tradesmen can mix and match them depending on the way they work and can replace a single glove easily if worn out.

Included in the range is the Precision Glove, which is light and flexible with a design priority on dexterity and fit, nuckle protection, cushioning and reinforcement to provide optimum protection. There is also the Power Glove, which is comfortable, hard-wearing and ideal for all kinds of heavy duty jobs on site.

## DICKIES Footwear Range

Dickies has introduced 14 new styles of safety footwear and improved a further six styles including new lines in PU/Rubber Sole, designed to have shock absorption and heat resistance to 300°. They are also high slip resistant and have non-clogging sole patterns. Extra comfort is offered with moisture wicking lining and a removable footbed. All of the Dickies footwear range is certified to the new standard EN ISO 20345:2011 and EN ISO 20345.

According to Dickies, its range of footwear is not only comfortable but it is also strong enough to withstand the rigours of the modern working environment.

## C.K TOOLS Magma Technician's Rucksack Plus

Following in-depth research, C.K Magma's Technician's Rucksack Plus features a wealth

of new, durable enhancements, developed in line with the working needs of tradesmen. The lockable zip system will keep the rucksack's reinforced pockets secure whilst on site or in transit to prevent tools escaping. Further features include a 100% waterproof polymer base which is not only easily wiped clean but also prevents scratches and scuffing. A reinforced shoulder strap delivers additional strength and durability to easily move tools on the job, whilst an ergonomic contoured shape base and back with extensive padding provides additional comfort whilst being carried.

## BIG WIPES 4x4 Range

Big Wipes' new 4x4 range of industrial strength wipes contains four powerful cleaning agents and four dermatologically tested skin conditioners to offer 99.9% anti bacterial protection. The manufacturer asserts that its 4x4 range has the ability

to shift all modern construction sealants, adhesives, paints, coatings and grime in an instant. As they are completely portable, they can be kept close to hand to remove the muck before it gets a chance to fully cure. Heavy Duty, Multi-Purpose, and Multi-Surface lines all include a 'flick and a click' lid, giving users a dual option of either dispensing a single wipe or a long continuous sheet of wipes.
